

Larry Potter

Cycling has been my passion for the past 35 years of my adult life. As a member of the COBRAS, I have become very involved in the time trial series at Cherry Creek State Park, the Karen Hornbostel Memorial Time Trial, managing and planning the seven week series, writing the weekly newsletters, handling registration, assigning the dozens of volunteers, interfacing with park management and our various partners, and handling all of the financial duties.

Since the KHMTT is a fund raiser for BRAC, I have had the privilege of working with and supporting BRAC for the past several years. I have a working relationship with Shawn and Yvonne as well as several individuals at USAC.

I have an extensive background in information technology, web development and software development. I currently work part time for a major software company as a subject matter expert in cloud computing security.

If you have ever used the KHMTT.com website to register, check your start time or accumulated points, you have seen my work. I developed the KHMTT and the COBRAS websites, as well as several other commercial sites.

I am a strong believer in and have a history of creating programs to bring more participation to the sport of bicycle racing. This has included encouraging casual cyclists to try racing, assisting junior clubs, working with physically challenged cyclists and encouraging athletes currently in other disciplines such as triathletes to participate in USAC/BRAC racing events.

I strongly support the mission of BRAC, and I know my strong IT and business background, coupled with my desire to help support BRAC through the challenges it currently faces would make me an ideal board member.
