Weather Policy The race is to be held rain or shine. Come prepared for any weather condition you may face on course.

Course Description

Riders should expect smooth dirt, gravel, sand and pavement (Approx. 4 miles for long course) The climbs have grades that are not indicated with the supplied GPX. Some grades reach 14%. Much of course is rolling hills with short rollers and a few extended. The Broad (starting at mile marker 13.1) from Greenland road to Larkspur is narrow, relatively flat but the road goes back and forth over Carpenter Creek which is very small but has narrow bridges with no guardrails. Be aware. B road surface mostly sandy, however packed in most areas loose in others. Tough spot for narrow tires.

Support

Feed is located on Lorraine Rd. climb near finish. No outside support for feeds or mechanical issues. Be prepared to take care of your own hydration and mechanical issues. Velofix will be set up on the top of the climb (approximately race mile 20), east of Larkspur with technical support and a water station. Technical support will also be provided in the feed zone on Lorraine.

Rules

1. 32c tire minimum
2. Centerline rule applies
3. Helmet required

See www.gritnineo.com for more rule information
